

## Numerise

Numerise is a new home learning solution to help parents, carers and families with maths at home. Questions match the topics in KS2 and KS3 so your child can practise independently, work through topics they are struggling with or get help with long-term revision. To prepare a year 6 child for joining year 7 in September, chose the [Secondary Ready course](#) within Numerise.

The website is in its pilot phase so please be prepared to see some changes over the next few months. You can currently join free of charge until September.

For more information, please use [this link](#).

### How to sign up:

- **Parents** have to register first: Click on the “Sign up” button.
- Click on “Supporting Adult”.
- Fill in the required boxes.
- Wait for the confirmation email to activate your account.
- Login with the details you have just created.
- Click on “Manage Accounts”
- Click on “+ Add Learner”
- Complete the boxes and add the new learner
- If you would like to sign up more than one child, click on “+ Add Learner” again.
- Ask one of the learners to login
- Chose the correct course for them. For a y6 student pick the “Secondary Ready course”
- Ask the learner to start solving questions.
- As a parent you can see your children’s progress when you login to your own account.
